RESEARCH FIELDS

Primary: Economics of Crime
Secondary: Labor Economics, Applied Microeconomics
Current Research Topics: ...

ACADEMIC WORK

Spring 2021	RA for Prof. Hans Grönqvist	Uppsala University
-------------	-----------------------------	--------------------

EDUCATION

2021 – 2026 (<i>scheduled</i>)	Ph.D. in Economics Dissertation Title: <i>Placeholder</i>	University of Gothenburg
2019 – 2021	M.Sc. in Economics	Uppsala University
2019 – 2020	Exchange	University of Maryland
2016 – 2019	B.Sc. in Economics	Uppsala University

RESEARCH VISITS

Fall 2024	London School of Economics	Host: Stephen Machin
-----------	----------------------------	----------------------

DISSERTATION / WORKING PAPERS

Chapter 1. From Friends to ‘Family’: Schools, Neighborhoods, and Gang Recruitment (Job Market Paper)

Abstract: This paper examines how gang-related criminal behavior spreads through extended family and peer networks, using newly linked Swedish administrative data covering over 18,000 individuals with confirmed gang affiliation. Within-family correlations reveal intergenerational transmission of criminal behavior where parental criminal history accounts for only half of a broader latent crime-family effect, with older siblings explaining most of the remaining influence. Building on this, I study what I term gateway peers—students whose older siblings have committed gang-related crimes—and estimate peer effects using quasi-random variation in cohort-to-cohort composition. Exposure in grade 7 significantly increases both general and gang-related offending by early adulthood, with effects concentrated within schools, not neighborhoods, and strongest when gateway peers share the students background. Excluding areas where gangs are not present, exposure also significantly increases the probability of being confirmed as gang-affiliated after compulsory school. I provide additional evidence of a recruitment mechanism beyond general peer influence: spillovers disappear when gateway siblings are absent during the expected recruitment window, and exposed students are more likely to co-offend with gateway peers relatives and confirmed gang members. Exposure further reduces academic performance and increases adolescent depression diagnoses. The findings highlight the role of sibling-linked peer networks in shaping criminal trajectories and suggest that preventative interventions targeting school environments may help disrupt recruitment into organized crime.

Chapter 2. The Effect of Neighborhood Incarceration Rates on the Criminal Behavior of Neighborhood Peers

Abstract: We use a reform that increased time served in prison from one-half to two-thirds to study the causal effect of neighborhood incarceration rates on the criminal behavior of non-incarcerated neighborhood peers. We find that ...

WORK IN PROGRESS

Encrypted Chats and Organized Crime Groups (larger research agenda) with Tom Kirchmaier (LSE), Magdalena Dominguez (IFS), Manne Gerell (MAU), Kim Moeller (MAU)

Age at Crime and Punishment with Akib Khan (SSE) and Erik Lundberg (UU)

Disinformation and Early Childhood Health with Cecilia Ahsan Jansson (GU)

SCHOLARSHIPS AND EXTERNAL FUNDING

2025	Barbro Oshers Foundation Stipend
2024	Clas Groschinsky Research Grant Adlerbertska Travel Grant University of Gothenburg Donation Board Scholarship
2023	Hedelius Travel Grant Adlerbertska Travel Grant

SEMINAR PRESENTATIONS AND CONFERENCES (*scheduled **)

2025	European Seminar on the Economics of Crime (ESEC)* Labor & Public Economics Seminar (Helsinki GSE)* Transatlantic Workshop on the Economics of Crime (TWEC)* Potsdam Phd Workshop*
2024	LSE PhD Labour Seminar Freiburg PhD-Workshop on the Economics of Criminal Behavior
2023	GU Department of Economics PhD Conference GU Crime Workshop

ADDITIONAL EDUCATION

Core PhD Courses: Microeconomics I, Microeconomics II, Econometrics I, Econometrics II, Econometrics III, Mathematics, Macroeconomics (2021-2022, University of Gothenburg).

Elective courses: Labor 3: Human Capital (2023, Stockholm University), Topics in Applied Economics (2022, University of Gothenburg), Applied Economics (2022, Stockholm University), Econometrics (2022, Stavanger University).

Pedagogical and Ethical Courses: Teaching and Learning in Higher Education 1: PIL101 (2022, University of Gothenburg), Research Ethics, (2022, University of Gothenburg).

TEACHING

2022 –	Macroeconomics (undergraduate)	Teaching Assistant University of Gothenburg
2022 –	Statistics (undergraduate)	Teaching Assistant University of Gothenburg

SERVICES

2024	Organizer of the Departmental Labor Seminar Series
2023 –	Organizer of the Departmental <i>PhD</i> Seminar Series
2021 –	Member of the Graduate Student Association (GSA)

LANGUAGES

Swedish (native), English (fluent), Portuguese (intermediate), French (basic).

TECHNICAL SKILLS

STATA, Python, R, GIS, $\text{\LaTeX}$, and some Bash.

OTHER

2023 –	Co-Organizer of the Graduate Student Football Group
2022	Winner of the GU Handels IF Football Cup
2017	Winner of the Uppsala University Student Futsal Series

Last updated: September 2, 2025
